Easy

Table: Delivery

```
+-----------------------------+---------+
| Column Name                 | Type    |
+-----------------------------+---------+
| delivery_id                 | int     |
| customer_id                 | int     |
| order_date                  | date    |
| customer_pref_delivery_date | date    |
+-----------------------------+---------+
```

delivery_id is the primary key (column with unique values) of this table.
The table holds information about food delivery to customers that make orders at some date and specify a preferred delivery date (on the same order date or after it).

If the customer's preferred delivery date is the same as the order date, then the order is called **immediate;** otherwise, it is called **scheduled**.

Write a solution to find the percentage of immediate orders in the table, **rounded to 2 decimal places**.

The result format is in the following example.

Example 1:

Input:
Delivery table:

```
+-------------+-------------+------------+-----------------------------+
| delivery_id | customer_id | order_date | customer_pref_delivery_date |
+-------------+-------------+------------+-----------------------------+
| 1           | 1           | 2019-08-01 | 2019-08-02                  |
| 2           | 5           | 2019-08-02 | 2019-08-02                  |
| 3           | 1           | 2019-08-11 | 2019-08-11                  |
| 4           | 3           | 2019-08-24 | 2019-08-26                  |
| 5           | 4           | 2019-08-21 | 2019-08-22                  |
| 6           | 2           | 2019-08-11 | 2019-08-13                  |
+-------------+-------------+------------+-----------------------------+
```

Output:

```
+----------------------+
| immediate_percentage |
+----------------------+
| 33.33                |
+----------------------+
```

Explanation: The orders with delivery id 2 and 3 are immediate while the others are scheduled.

```
SELECT ROUND(SUM(IF(order_date=customer_pref_delivery_date,1,0))*100/COUNT(*),2) AS
immediate_percentage
FROM Delivery
```
