

Easy

Table: ActorDirector

Column Name   Type	
actor_id	int
director_id	int
timestamp	int

timestamp is the primary key (column with unique values) for this table.

Write a solution to find all the pairs (actor\_id, director\_id) where the actor has cooperated with the director at least three times.

Return the result table in **any order**.

The result format is in the following example.

#### Example 1:

##### Input:

ActorDirector table:

actor_id	director_id	timestamp
1	1	0
1	1	1
1	1	2
1	2	3
1	2	4
2	1	5
2	1	6

##### Output:

actor_id	director_id
1	1

**Explanation:** The only pair is (1, 1) where they cooperated exactly 3 times.

# Write your MySQL query statement below

```
SELECT actor_id,director_id
FROM ActorDirector
GROUP BY actor_id,director_id
HAVING COUNT(*)>=3
```
