

Easy

Table: Person

Column Name Type	
id	int
email	varchar

id is the primary key (column with unique values) for this table.

Each row of this table contains an email. The emails will not contain uppercase letters.

Write a solution to report all the duplicate emails. Note that it's guaranteed that the email field is not NULL.

Return the result table in **any order**.

The result format is in the following example.

Example 1:

Input:

Person table:

id	email
1	a@b.com
2	c@d.com
3	a@b.com

Output:

Email
a@b.com

Explanation: a@b.com is repeated two times.

Write your MySQL query statement below

```
SELECT email AS Email
FROM Person
GROUP BY email
HAVING COUNT(*) > 1
```
